**Full Length**

**Double Wheel Option**

**Hospital Bed ParkingTargets** are a simple and effective way to prevent Hospital Beds, Carts and Racks from hitting the walls. Hitting the walls can cause thousands of dollars in damage to vital expensive medical equipment, walls, and jacks each year. Applying a **Hospital Bed ParkingTarget** to the floor in front of the wall makes it easy to park Hospital Beds and other equipment in the "Same Place" Every Time! The Targets have solid surfaces and solid end caps, which make them easy to clean. They have Peel-n-Stick tape on the bottom, so they are easy to install. **Only ONE** is needed per bed and they are long enough to span both wheels. This simple solution is a great way for Hospitals, Nursing Homes, and other facilities to "Save Time and Money every year with Less Maintenance."
